

# PCMIS

## REPORTING TOOL

PCMIS Reporting provides end-to-end service performance visibility enabled by extensive analytics and reporting tools.

### Greater Clarity, Scalability and Secure

PCMIS reporting provides a granular approach to reporting meaning services can gain detailed insights into service, team and worker performance quickly and accurately.

#### Real-Time insights

Timely, up-to-date reporting supports effective actions to ensure services consistently operate at maximum efficiency

#### Data modelling

Availability to transform raw data requirements into a structured format, improving data quality, consistency and accessibility

#### Dynamic filtering

Allowing services to tailor reporting to their specific requirements to produce the most effective insights

#### Operational insights

With an extensive range of reporting and data analytics easily controlled by access level and permissions

#### Outstanding NHS Talking Therapies data quality as standard

IAPT KPI reports including Recovery by Clinician and Reliable Recovery and Reliable Improvement reports

#### Zero Extra Cost — Included as Standard

No add-ons, no upgrades. The reporting tool is provided as integral part of the PCMIS case management system to support services
