

# PCMIS

## SMS COMMUNICATION TOOL

The PCMIS direct SMS communication tool allows services to update patients securely, efficiently and conveniently, with all communications managed through one centralised system.

### **Intuitive, Accessible and Efficient**

Seamlessly embedded within the PCMIS system, this powerful tool enhances client communication through an intuitive, easy-to-access interface, saving clinicians valuable time and minimising errors.

#### **✔ Built with clinicians in mind**

Purposefully built to mirror other functionality within the system, ensuring processes are streamlined and accessible.

#### **✔ Historical & Transparent**

Complete audit trail of previous SMS communications are available to view for transparency and maintaining full visibility of a case.

#### **✔ Increased Efficiency & Productivity**

Streamlined work flows and automatic data completion with reduced reliance on external processes.

#### **✔ Flexibility**

Providing patients with a choice of communication, empowers the patient and leads to less DNA's.

#### **✔ Better Data security and compliance**

Using a secure, integrated communication platform designed for case management helps ensure that sensitive client or case data is shared within a controlled, compliant environment.

#### **✔ Productive**

SMS allows for short URL webinar links to reaching patients instantly, drive quick reaction and significantly increase attendance and engagement.
