

PCMIS

SUPERVISION HUB

The PCMIS Supervision Hub streamlines case discussions, improves clinical oversight, and reduces administrative burden—allowing teams to focus on high-quality care, not paperwork.

Smarter Supervision. Stronger Services.

Designed to strengthen governance, enhance performance, and support staff, the Hub brings everything you need for effective supervision into one simple, powerful workspace.

RI ● RR ●

✓ Real-Time, Data-Driven Case Management

Outcome Feedback, risk indicators, PHQ-9 & GAD-7 scores, Reliable Recovery and Reliable Improvement metrics and indicators instantly visible and in real time.

✓ One location for Notes & Discussion

Supervisors and workers record notes collaboratively in real time, with the ability to add the Supervisors notes to the case.

✓ Clinical Support Tools

A suite of support tools for treatment strategies for Not-On-Track cases are available to adapt and personalise care.

✓ Automated Session Scheduling & Calendar Management

Set up sessions in seconds with a few clicks. The Hub updates system calendars automatically adding, updating, or removing session entries for all.

✓ Quick Identification of Priority Cases

'Not On Track' alerts, severity colour coding, tags, and sortable caseload tables make it easy to focus on patients who need supervision most.

✓ Zero Extra Cost — Included as Standard

No add-ons, no upgrades. The Supervision Hub is built into PCMIS and ready to use.
